

Are droughts withering our resources?

Nancy J. Selover

*Senior Sustainability Scientist, Global Institute of Sustainability
Arizona State Climatologist, State Climate Office*

Rimjhim Aggarwal

*Senior Sustainability Scientist, Global Institute of Sustainability
Assistant Professor, School of Sustainability*

Summer Waters

*Water Resources Extension Agent, Maricopa County
Arizona Cooperative Extension, The University of Arizona*

Hallie Eakin

*Senior Sustainability Scientist, Global Institute of Sustainability
Associate Professor, School of Sustainability*

More than half of all U.S. counties have been listed as natural disaster areas; the vast majority of them received this designation because of the drought. It's being said that the 2012 U.S. drought is the most serious since 1988. Is it an indicator of climate change?

Join an expert panel in a discussion on what this means for our economy, agriculture, and how it will impact our water resources.

Moderated by Climate Change Science Manager, Nalini Chhetri.

The Global Institute of Sustainability's Case Critical series responds to time-sensitive sustainability concerns at the local, national, and global level. Experts swiftly mobilize for solution-based discussions focusing on the environmental, social, and economic implications of high-stakes threats and breaking news issues.

Thursday, September 6, 2012

9:00 – 10:30 a.m.

(breakfast will be provided)

Wrigley Hall, Room 481

RSVP link: Download any free QR-Code reader app to your smart phone. Scan this code and it will take you directly to the RSVP page.

RSVP: sustainabilityevents@asu.edu

Parking: Apache Street Parking Structure just south of the Memorial Union
