*Newberry Professor of Earth and Environmental Sciences,
Lamont-Doherty Earth Observatory, Columbia University*

Peter Byck

Director and Producer, Carbon Nation

John Hofmeister

*Former President, Shell Oil Company
Julie A. Wrigley Private Sector Executive-in-Residence,
ASU's School of Sustainability*

Mike Pasqualetti

*Senior Sustainability Scientist, ASU's Global Institute of Sustainability
Professor, ASU's School of Geographical Sciences and Urban Planning*

The Keystone XL Pipeline, a large-scale project proposed to transport oil from Canada's tar sands to the U.S., is an issue at the forefront of climate change action and debate. As we enter an age of energy uncertainty, will compromising our natural lands yield a sustainable future?

Join this panel discussion and discover the political, economic, and environmental pressures of the heated Pipeline controversy.

The Global Institute of Sustainability's Case Critical series responds to time-sensitive sustainability concerns at the local, national, and global level. Experts swiftly mobilize for solution-based discussions focusing on the environmental, social, and economic implications of high-stakes threats and breaking news issues.

Friday, February 22, 2013

2:00 – 3:30 p.m.

(refreshments will be provided)

Wrigley Hall, Room 101
